Listen for the Honker

What interesting nature story lies behind the perfect V-shaped flying formation of the Canada Goose? And why is this formation sometimes broken? Here is a wild life tale that will interest everyone!

The Plant that Eats Bugs

The Pitcher Plant—strange flower of the wilderness! Read how it works its deadly powers and ensnares living insects that dare venture near its innocent-looking petals. This article will amaze you!

Nature for Children

Why should you encourage your children to study the birds and flowers as much as text books? William L. Finley, noted wild life authority, offers an interesting slant on this important question in next Sunday's Journal!

the Cricket's Orchestra

Many think it's the ordinary cricket that makes sweet music these September nights. Read the wild life page of next Sunday's Journal for the true story of these sleep-inspiring chirps—meet the crickets' orchestra!
