Sportsmen Urged or Game Board Corvallis, Or., Nov. 28 (U.R)—The

Oregon Wild Life Federation assembled in fifth annual convention today accepted a proposal from Gov. Charles A. Sprague that it recommend whether the state game commission should be given additional authority.

The governor proposed that the federation determine whether the commission should have more power to establish seasons and bag limits. He said the legislature's sessions were too far apart to insure proper game management through legislation.

He suggested the federation survey game and fish problems and submit its findings.

The convention went into its second day with 150 delegates present under the gavel of W. J. Smith, federation president.

Dean William A. Schoenfeld of Oregon State college's school of agriculture spoke on conservation and Stanley G. Jewett, regional biologist of the federal fish and wild life service, spoke on the value of waterfowl refuges in replenishing the supply of game

Problems confronting fish conservationists including splash dams and irrigation ditches were outlined by Frank B. Wire, state game supervisor.

William L. Finley, naturalist, advanced a contention that the Willamette valley flood control project would endanger supplies of game and commercial fish because dams on the Santiam, Mc-Kenzie and Willamette rivers did not contain fishways.

Regional Forester Lyle F. Watts spoke on the recreational value of national forests in the Pacific northwest.

The federation voted unanimous approval of a bill to be submitted to the state legislature closing coastal streams to commercial fishing, with the exception of the Columbia river and present al-

The bill would ban commercial fishing from Nov. 30 until June 1. Federation leaders said they believed such action would aid both sports and commercial fishermen by protecting the steelhead runs.

Governor Sprague Queries Oregon Wildlife Federation BY HERBERT THE OFFICE OF THE O

Staff Writer, The Oregonian CORVALLIS, Nov. 27 (Special) - The Oregon Wildlife federation, meeting here Wednesday in its fifth annual conference, was asked by Governor Charles A. Sprague to determine whether or not the Oregon state game commission should be vested with additional legislative authority.

"Each legislative session," said Governor Sprague, "is visited with many minor bills hav-

legislation. I am asking this federation to make a survey of game and fish problems and to submit the results of its re-search." He asked that the survey contain recommendations concerning the power of the commission to regulate seasons and bag limits on game and

"What I particularly want to know," said the state's chief executive, "is whether or not you believe the state game commission should have more power to establish seasons and bag limits—should have more legislative authority." The biennial sessions of the legislature, he intimated, were too far apart to insure proper game management.

The meeting opened with approximately 150 in attendance in the Memorial union building. Dean William A. Schoenfeld welcomed the federation members and spoke briefly on conservation. W. J. Smith, president of the organization, directed the program.

Willamette Project Hit

Dean William A. Schoenfeld of Oregon State college's school of agriculture spoke on conservation and Stanley G. Jewett, regional biologist of the federal fish and wild life service, spoke on the value of waterfowl refuges in replenishing the supply of game birds.

Problems confronting fish conservationists including splash dams and irrigation ditches were outlined by Frank B. Wire, state game super-

visor.
William L. Finley, naturalist, advanced a contention that the Willamette valley flood control project would endanger supplies of game and commercial fish because dams on the Santiam, McKenzie and Willamette rivers did not con-

tain fishways. Regional Forester Lyle F. Watts spoke on the recreational value of national forests in the Pacific northwest.

Coast Stream Ban Okehed

The federation voted unanimous approval of a bill to be submitted to the state legislature closing coast-al streams to commercial fishing, with the exception of the Columbia river and present allowances.

The bill would ban commercial fishing from November 30 until June 1. Federation leaders said they believed such action would aid both sports and commercial fishermen by protecting the steelhead runs.

Jewett, Wire Speak

Chief speakers on the opening program included Stanley G. Jewett, regional biologist of the federal fish and wildlife service; Frank B. Wire, state game supervisor, and Lyle F. Watts, regional forester for this region.

Mr. Jewett described the worth of waterfowl refuges and pointed to the "almost marve-lous" increase of waterfowl

during the past ten years. Frank Wire spoke at length on the problems confronting fish conservation.

William L. Finley, naturalist, spoke on the Willamette valley flood control project and de-scribed the project as "flooding out at least six valley cities. He said that not one of the dams to be constructed on the north and south forks of the Santiam river and those of the McKenzie river and the middle fork of the Willamette would contain fishways.
