MONTHLY MEETING, TUESDAY, FEBRUARY 12, 1935

**ROY CHAPMAN ANDREWS on "NEW CONQUEST OF
CENTRAL ASIA"**

ORCHESTRA HALL

Roy Chapman Andrews, who has recently been appointed Director of the American Museum of Natural History, New York, is one of the world's foremost explorers. He was awarded the Hubbard Medal of the National Geographic Society in recognition of his achievements, as well as tokens from other learned societies.

As leader of the several expeditions of the American Museum to Mongolia and China, which were originally organized with the purpose to discover the ancestry of man, Doctor Andrews, with a well organized scientific staff, has conducted explorations on an unprecedented scale, and the researches made on these journeys cover the geologic, topographic, paleontologic, archaeologic and biotic survey of Mongolia.

Doctor Andrews will tell the story of his experiences on these expeditions; of his discovery of the colossal *Baluchitherium*, largest of land mammals; of the giant predator *Andrews-archus*, greatest of all carnivora; of the huge shovel-tusked mastodons, and many smaller forms. The lecture will be illustrated with still and motion pictures.

INTER-MONTHLY MEETING, TUESDAY, FEBRUARY 26, 1935

WILLIAM L. FINLEY on "BIRDS, BERGS AND KODIAK BEARS"
ORCHESTRA HALL

Great Kodiak bears charging the cameraman, shaggy brown eubs, forty-ton whales leaping into the air, porpoises racing the prow of the ship, gigantic ice pinnacles toppling from glaciers into the sea, and water-fowl flashing from coastal caves, are some of the scenes in William L. Finley's spectacular motion pictures taken on two long northern cruises.

Mr. Finley and Mr. Arthur N. Pack, President of the American Nature Association, with a guide, stalked Kodiak and grizzly bears when they came to fish along the salmon streams. Mr. Finley's personal account of his experiences on these expeditions will be of great interest to the members, who will remember his previous lecture "Camera Hunting on the Continental Divide," so much enjoyed a few seasons ago.

March Lectures

"Conquering the Aghileen Pinnacles" by Bernard R. Hubbard, S. J., March 12

"A Night on the Spanish Main" by Edward Tomlinson, March 26.

(The April lectures will be announced later.)
